  - **Image size:** Choose the image size.
  - **White balance:** Choose the lightness when taking a photo.
  - **Anti-Banding:** Choose the anti-banding.
  - **Night mode:** Choose to turn on or turn off night mode.
  - **Photo default name:** Set the beginning name for photo.
- **Save location:** Check the photos location.
- **Memory status:** Check the capacity of memory.

## SECURITY TIPS

### Electrical Equipments

Please turn off the phone beside the high-precision controlled equipments, or it will because the equipments cannot work normally.

The Electrical equipments include: hearing aids, pace maker, fire alarm, automatic door and other automatic controlled equipments. If you will use some medical machines, please first contact with the service center which deal with these medical machines to check whether these medical machines will be influenced by wireless wave or not.

### Medical Places

Please pay much attention to the following tips in medical places:

Please do not install and use this phone in operating room, ICU room and CCU room.

Turn off this phone near to medical machine areas.

Carry out the policy and rules in medical place which should be forbidden to use phone.

Pay much attention to the ring tone, volume and vibrating alert settings in order to cause any influence on heart patient.

### Flammable And Explosive Places

In the flammable and explosive areas, please do not connect this phone to external power supply in order to avoid explosion or fire. These places include:

Gas station;

Fuel zone;

Transport and storage place for fuel and heavy chemicals:

Places with the chemical substances or mote air;

Areas with explosion and dangerous mark;

Areas with "turn off wireless equipments" mark;

Areas needed you to turn off the car engine and so on.

### Storage Environment

Put the phone far away from the magnetic equipments such as, magcard and floppy disk for the radiation of the phone will erasure the information saved in these magnetic equipments.

Please do not put the phone, battery and adapter in strong magnetic implements, such as electromagnetic pan and microwave oven, or it may cause circuit problem of this phone, fire or explosion.

Please do not put the phone, batter and adapter in high temperature or low temperature places, or it may cause circuit problem of this phone, fire or explosion. Please do not put the pin and other mental like pin near to handset, or these pins or other mental like pin will be caught by the magnetism of handset and this maybe make damage on people.

### Children Healthy

Please put the phone, battery and adapter on the place which cannot be touched by children and also do not let unattended children play this phone, battery and adapter. Please do not let children suck the battery or it may cause poisoning.

Please do not let children touch the components of this phone or it may cause damage on children.

### Operation Environment

There is no water resistance for your phone, battery and adapter, so please keep dry when you use this phone. Please do not let your phone, battery and adapter in wet environment or do not pick up the handset by wet hands in order to avoid phone short circuit, problems caused by rusty or people getting electric shocks.

Do not use this phone in the dusty, wet, dirty, or near to magnetic field environment in order to avoid inside circuit problems.

In thundery weather, please do not use this phone when this phone is being charged or use this phone outdoor in order to avoid lightning strike or other damages.

Please do not touch the antenna when you are in a call which will affect the call quality and the power will be higher than normal one which will cut down the speaking time and stand-by time.

The signals of this phone will interference the near television, radio and computer.

Please use the authorized accessories and comply with international radio frequency radiation policy.

### Clean And Maintenance

Turn off the phone before clearing and maintaining and if the phone also is connected to external power supply, please disconnect the phone from external power supply in order to avoid getting electric shocks, battery or adapter short circuit.

Do not use chemical materials (such as alcohol, benzene), chemical lotion, or frosted cleanser to clean phone housing or this may cause damage or fire. You can use a little wet, anti-static soft cloth to clean the phone.

Please do not scratch or alter phone housing, otherwise, the coatings could cause allergy if body is an allergic reaction. Then you should stop using this phone and go to see a doctor for help.

Clean the dust on the plug and keep the plug dry in order to avoid fire.

If the phone and authorized accessories cannot work normally, please contact the authorized service center where you can get help.

### Emergency Call

In emergency situation, when the phone is turned on and is placed in service area, you can make emergency calls by this phone. But, we can not ensure the network can be connected in any conditions, so this phone can not be as the only contact way.

### Battery Usage

Only the authorized battery made by manufacturer can be used, and do not use other wrong battery, or it may cause explosion.

Please do not throw the battery to fire, or it maybe cause battery on fire or burst.

Please connect mental, keys, jewelry and so on to positive and negative terminals in order to avoid battery short circuit and the body damage for hot battery, such as burn.

Do not remove the battery or weld the battery poles directly by yourself in order to avoid battery leakage, overheating, fire or burst.

If battery leakage, smoke or with bad smell, please stop using it and keep it far away from fire and body in order to avoid fire or burst. Under the security condition, hand it to qualified maintenance place for handling.

If the inside liquid of the battery drop on skin or clothes, please immediately flush it with water in order to avoid skin damage.

If the inside liquid of the battery is splashed to eyes, please do not rub it or it will make eye sight damaged. You should immediately flush eyes with water and go to hospital for medical treatment.

When the battery is being charged or in a storage process, you find deformation, color changed, with high temperature. Please stop using it, or it may cause battery leakage, overheating, burst or on fire.

When the battery cannot be installed correctly, please do not extrude the battery in order to avoid battery leakage or burst.

If you do not use battery for a long time, please keep it in room temperature after charging it.

### Eternal Power Supply

Only the authorized adapter made by manufacturer can be used, and do not use other wrong adapter, or it may cause problems or explosion.

Do not cause external power supply short circuit in order to avoid problems, smoking or on fire.

If the power supply has been damaged (such as wires, fault), or exposed connection plug has been loosen, please do not continue to use it in order to avoid shock, external power supply short circuit or fire.

Do not place the water container with water in to the external power supply which may cause leakage or other malfunctions.

Do not charge the battery in dusty, damp environment and the power cable can not be near to heating utensils.

Before charging the battery, please confirm that the external power plug has been inserted to socket correctly. If the external power plug is undeserved, it can cause shock, phone or battery on fire or explosion. After finish the charge, please pull out the plug and do not pull out the adapter cable.

External power supply should be qualified alternating voltage, or it may cause fire or problems.

Do not wet hands contact the adapter plug, cable which are being charged, or it may cause a shock.

If the liquid like water enter into the adapter, please pullout the plug from the socket in order to avoid overheating, fire or other malfunction

### Radio Frequency Exposure Standards

This phone is in accordance with requirements of radio frequency exposure standards.

This phone is a low power receiver and transmitter, and its design is made comply to the international standards advice on RF radiation energy limits which are parts of international norms and it is part of the provisions in the general public RF energy radiation housings. These principles are made by international independent scientific organization after exhaustive research and then they are set. At the same time, the group also evaluates these stands regularly to ensure its effectiveness.

These standards contain many safety coefficients to ensure the health of any age people and user's personal safety.

The radio frequency radiation standards of this phone is measured and evaluated by SAR (Specific Absorption Rate). According this standard, the maximum SAR value for this phone is 2.0W/kg. The SAR value tests for this phone comply with the standards tests and we are using the normal use of this phone pose maximum output power to test various frequencies. Although the SAR value is measured as the maximum one, in fact, this phone is in general used with the SAR value far less than the maximum of network connection with the lowest level of power. Usually, the phone is more close to base station, the less power output. When you are using this phone near to head, the measured maximum SAR value is 1.161W/kg, although the SAR values are different at different positions for this phone, which are all related to standards.

Please note: If this phone design has been changed, the SAR value will be changed. But in any case, the designs of this phone are accord with requirements of standards.

- (1) ICNIRP advice that for the phone used by public people, the standard max. SAR value will be less 2.0W/kg for every value of every 10 grams of body. This standard contains enough safety space for protecting public security. At the same time, it also contains the difference caused by measuring error. In the condition with different measuring requirements and frequency, maybe the SAR values are different.

### Environmental Protection

Please comply with the local laws for handling the wrapper of this phone, the old battery and phone. Please do not throw the defective phone or battery to waste bin or fire in order to avoid explosion.
