

## Burnside Fixed Cellular Phones Model P355 GSM Desk Phone

### Every desk should have one - here's why...

The Burnside P355 is the latest addition to the P300 range of GSM desktop phones designed for the wireless office and home. It combines the simplicity of a landline phone with the flexibility of a mobile phone. Any standard mobile SIM is all that is required for connection to the network.

Anyone can install a Burnside P355 and use it without having to read a manual. The large keys are easy to see and select without making a mistake. Just dial a number and pick up the handset for a fast connection. When it rings, just pick up the handset or press the handsfree key.

The P355 series includes many features that are not available on ordinary handheld phones but are essential to efficient phone communications. For example, Burnside Easy Call Transfer™ allows incoming calls to be transferred by the user to any other phone. Hands-free answering, headset and call recording options provide convenience in a very wide range of applications. Microsoft® TAPI compatibility allows power dialling from computer-based applications.

### P355 Main Features

- Quad-band GSM for worldwide phone, SMS and Internet connections
- Easier and quicker to install, offering lower call costs than landlines
- Clear visual display for easy set up and use without a manual
- Superior voice quality using Burnside Crystal™ technology
- External antenna optimises GSM signal reception
- SMS send and receive from the phone keypad or attached PC
- Power supply with integral battery backup provides constant availability
- Permanent and shareable resource that anyone can use
- Advanced office phone features, including Burnside Easy Call Transfer™
- Accommodates plug-in headset or Bluetooth connection
- Handsfree operation with built-in loudspeaker
- Optional wall mounting accessory for safety and security
- External antenna reduces radiation risk compared to handheld mobiles
- Designed, manufactured and supported in the UK

*Burnside Telecom is a designer and manufacturer of innovative fixed cellular terminals, desktop and wall mounted mobile phones and modems for voice, SMS text, Internet and e-mail access applications. Our products are currently used in 19 countries across the globe by customers including multinational companies, mobile network operators, government departments, local authorities and security services.*
